# KEY TAKEAWAYS

This is a Dashboard on Hospital Analytics. There are total no. of 9216 patients, which includes 4705 Males and 4487 Females. Here are the insights from the Project:

1. **High Efficiency** : Both monthly and overall views shows that 60% of the patients are attended within 30 mins.
2. **Gender Balance** : There is a slight male majority in both monthly and overall views.
3. **Hourly Trend** : We can see that there is a surge in the no. of patients from early morning (00-02) to morning (07-08). This period will require heavy staff attention and emergency care.
4. **Weekend/Weekday Trend** : Both monthly and overall views shows that majority of the patients were admitted during weekdays.
4. **Department Load** : General Practice is consistently the busiest departments in the hospital.
5. **Race Distribution** : Out of the patients admitted, White are highest in numbers (2.6K).
